

Voice Notes

Never forget about anything...

In our day-to-day it is easy to forget about something we need to do, or the name of a person, a telephone number, or something to buy at the supermarket. Sometimes we write things down, but sometimes we just have our mobile phone to record important things. So, why not do so with your own voice? No more excuses! With Voice Notes you can save every important task, To Do, your boss birthday, the location of a nice restaurant or just the things you need for dinner tonight!

Forget about asking for a pen and write down things in a piece of paper that you may lose... Just store the Voice Notes number in your agenda and call from your mobile phone to record your Voice Notes. They will be stored in the system and you will be able to retrieve them just by calling the service's access number. Regardless of the mobile device you have you can even store your Voice Notes from a landline phone. To access Voice Notes, you do not need to download anything into your phone or to have a specific model. You can use the service from any mobile or landline phone device.

With Voice Notes, store all relevant information and retrieve it as you like. For easier retrieval, the service provides a convenient alarm setting system, which you can be set up according to your needs. Define a date and a time to be reminded about things and Voice Notes will call you and play your voice message.

Extremely useful notes

Voice Notes is a value added service to address your clients' needs and help them in their daily lives. With this service, you can offer a new voice-based solution useful for all type of clients: people who travel a lot, high-level professionals, young people, students...And it does not matter the device they have, as voice notes works on a call-in, call-out basis that can be done by any mobile or landline phone. Operators can now boost the revenues they get from voice-based services such as Voice Notes as it is inexpensive and it can help them gain new clients regardless their age and technical ability.

Voice Notes Use Case

Ann has been appointed Manager of her company's new branch in London. She is moving there from Madrid and needs to find an apartment to live in. On her first day in London she walks around a nice area to look for apartments. She has seen a couple of apartments that might suit her. When getting to the hotel, she plans to call the agents and arrange a visit so she can decide for one of them. Unfortunately, she then has a mess in her head and she was not able to write anything down. So now she cannot remember which were the apartments she liked... she now has to go again and spend a long time walking around...and maybe she will not be able to locate them all again... what can she do?

With Voice Notes she will never forget about anything! She can record her notes with her own voice or a video call on her mobile phone every time she needs to remember something. The notes will be stored and she will be able to retrieve them anytime anywhere or set alarms for reminders. Video / Voice Notes is a very useful personal assistant when she wants to remember an exact location, a restaurant that looks good or the way home from the office in a new city!

Store a note or 1000!

Almira Labs comprehensive solution is designed to allow operators to target these and other requirements for their subscribers, so that companies or individual customers can enhance the basic function of today's phones.

- Convenient: Users can keep as much information as they need from their mobile phone while walking or driving with a simple call. No more looking for a pen or paper to write down.
- Easy to use: With a simple call that can be made from any fixed or mobile phone, users can store as many notes as they need, either 1 or 1000. And they can retrieve them in the same way, with a simple call to the service. Additional alarm settings are offered for a more comprehensive solution.
- Faster: Users do not need to stop what they are doing and type a note that they might forget about. Now they just need to call the Voice Notes access number, store their Note in their mobile agenda, and they can record their notes on the go.
- Accessible: Users can record and retrieve their notes at anytime and anywhere, with a quick call to the system. This makes the service accessible for people of all ages and even for visually impaired people that depend on voice to communicate with the people around them.

Voice Notes, 100% helpful

Video / Voice Notes is designed to help you in your daily tasks. It is a convenient service aimed at bringing more power to your mobile device and extend the use of voice and video. By saving your voice notes you can store all useful information easy and fast. Recording video messages allows storing all relevant information about a certain place or particular details that otherwise you are very likely to forget.

Storing is easy as well as it is when it comes to retrieving, just a phone call and you will be able to access your saved notes and the service will facilitate browsing across them. An alarm system can also be set up, so you can decide when you want the service to remind you about a particular stored note. This is very helpful when you are busy working or traveling....

Voice Notes works on a subscription basis so you are not required to download any application. By subscribing to the service you can use it from day one. And it works in any 3G capable device so no high-end terminals are required. Need more reasons to have it right now?

About Almira Labs

Almira Labs is a highly innovative telecom software company focused on providing solutions for wire-line and wireless telecom operators. Through an extensive R&D effort, Almira Labs tools allow fast and low-cost development of Value Added Services for the NGIN with an approach that is unique in the marketplace.

Using this technological base, Almira Labs offers CSPs a broad catalogue of new services that deliver rich communications experiences to multiple user communities through innovative video, voice and media broadcast technology. Besides, services are device independent, thus operators can now reach the whole subscriber base regardless of their technological ability or expenditure level. Almira Labs helps Telecom Operators to generate new recurring revenue streams with a very low investment, in the shape of a Network Application Store as a weapon to fight fierce competition from Device-centric applications stores like the Apple or Android ones.
